What This Book is About	16
What's New	18
Please Read This!	18
What's Different About BorderManager 3.7?.....	19
What's New in the Third Edition, Revision 2	20
What's New in the Third Edition	20
What's New in the Second Edition.....	21
Printing This Book	22
Chapter 1 - The Network Configuration	23
Chapter 2 - The Basics	25
How Packet Filtering Works.....	25
Stateful Filter Exceptions.....	25
ACK Bit Filters.....	26
Filters and the Relationship to NAT and Routing.....	27
What Are Port Numbers?	28
How Routing Works	30
Setting up the Default Route	32
Public and Private IP Address Networks.....	36
Secondary IP Addresses	38
NAT (Routing) versus Proxy	40
Dynamic NAT - for Outbound Traffic	42
NAT Implicit Filtering	43
Disabling NAT Implicit Filtering in INETCFG.....	43
Disabling NAT Implicit Filtering at the Server Console Prompt.....	44
Security Implications for Disabling NAT Implicit Filtering	44
Static NAT - For Inbound Traffic.....	45
Static NAT and Filtering	46
Setting up Static NAT	47
Static NAT versus Reverse Proxy Acceleration	50
Viewing & Capturing TCP/IP Traffic	51
Static NAT Example Debug Trace.....	52
Default BorderManager Filters	53
What are Default Filters?.....	53
The BorderManager 3.x Default Filters.....	53
The Default Filtering Action – All Versions of BorderManager	55
FILTCFG Examples of the Default Filters.....	55

Default Filter Exceptions.....	58
BorderManager 3.0, 3.5 and 3.6 Exceptions	58
FILTCFG Examples of the BorderManager 3.0, 3.5 and 3.6 Default Filter Exceptions.....	59
BorderManager 3.7 Default Filter Exceptions.....	69
Filter Exceptions for Proxies You Might Have in BorderManager 3.7	70
Security Considerations.....	71
Chapter 3 - NetWare Tools Used in Filtering	73
iManager	73
FILTSRV.NLM.....	73
BRDCFG.NLM.....	73
CONFIG (Not CONFIG.NLM).....	74
CONLOG.NLM	74
FILTCFG.NLM.....	74
IPFLT.NLM / IPFLT31.NLM.....	76
SET TCP IP DEBUG=1	76
SET FILTER DEBUG=ON	77
TCPCON.NLM	77
VPNCFG.NLM	77
Chapter 4 - Working with Filters.....	78
Backing Up and Restoring Filters and Exceptions Prior to BorderManager 3.7	78
Backing Up and Restoring BorderManager 3.7 IP Filters and Exceptions	78
The FILTSRV MIGRATE Procedure	80
Viewing Filters in Action (TCP IP DEBUG).....	81
TCP DEBUG PING & DNS Example.....	82
Browsing Example – No Proxy Configured.....	84
Browsing Example – Proxy Configured, Default Filter Exceptions.....	86
Filter Debug - An Alternative to TCP IP DEBUG	88
Filter Debug Example Output	90
NCF Files To Use With SET FILTER DEBUG=ON	91
T1.NCF (Turn On Debugging and Capture the Results).....	91
T0.NCF (Turn Off Debugging and Display the Results)	91
Making a Custom Filter Exception in FILTCFG.NLM.....	92
Part 1, Starting To Make A Filter Exception.....	92
Part 2, Defining a New Filter Definition.....	99
Part 3, Finishing the Filter Exception	107
Making a Custom Filter Exception in iManager	110
Start iManager	111
Adding a New Service Type	117
Adding a Filter Exception with the New Service Type Definition.....	122
ConsoleOne View of BorderManager 3.7 Filters	134
Chapter 5 Example Outbound Filter Exceptions.....	136
AIM (AOL Instant Messenger) / AOL.....	137
Cisco VPN Client	138
Citrix WinFrame / MetaFrame	140
Client-to-Site VPN over NAT	142
CLNTRUST.....	145
DNS	147
Outbound DNS Filter Exceptions for Internal Hosts.....	147
Outbound DNS Filter Exceptions for BorderManager 3.7 DNS Proxy (and Other Proxies).....	149
FTP	151
Outbound FTP Filter Exception for Internal Hosts	152

Outbound FTP Filter Exception for BorderManager 3.7 FTP Proxy.....	153
GroupWise Remote Client.....	154
ICQ (Version 2000b)	155
HTTP	157
Outbound HTTP Filter Exception for Internal Hosts	157
Outbound HTTP Filter Exception for BorderManager 3.7 HTTP and Transparent HTTP Proxy....	158
IMAP	159
Microsoft MSN Messenger.....	160
Microsoft Windows Media Player.....	161
NNTP.....	163
Outbound NNTP Filter Exception for Internal Hosts	163
Outbound NNTP Filter Exception for BorderManager 3.7 News Proxy	164
NTP/SNTP.....	165
pcANYWHERE	168
PING (ICMP).....	171
POP3.....	172
Outbound POP3 Filter Exception for Internal Hosts	172
Outbound POP3 Filter Exception for BorderManager 3.7 Mail Proxy.....	173
RDATE	174
RealAudio.....	176
Outbound RealAudio Filter Exception for Internal Hosts.....	176
Outbound RealAudio Filter Exception for BorderManager 3.7 RealAudio/RTSP Proxy	179
RTSP (Real Time Streaming Protocol)	180
Outbound RTSP Filter Exception for Internal Hosts.....	180
Outbound RTSP Filter Exception for BorderManager 3.7 RealAudio/RTSP Proxy	181
SMTP	182
Outbound SMTP Filter Exception for Internal Hosts	182
Outbound SMTP Filter Exception for BorderManager 3.7 Mail Proxy.....	183
SSL (HTTPS).....	184
Outbound SSL Filter Exception for Internal Hosts	184
Outbound SSL Filter Exception for BorderManager 3.7 HTTP Proxy.....	185
TELNET.....	186
Outbound TELNET Filter Exception for Internal Hosts.....	186
Outbound TELNET Filter Exception for BorderManager 3.7 Transparent Telnet Proxy.....	187
Terminal Server.....	188
VNC Viewer	189
VNC Browser Interface.....	190
Chapter 6 - Example Inbound Filter Exceptions	191
DHCP to a PC on the Public Subnet	192
DHCP to the BorderManager Server	195
Novell Remote Manager (NRM) on Generic TCP Proxy (on Secondary IP Address).....	197
Reverse HTTP Proxy (on Secondary IP Address).....	199
SSL to Reverse HTTP Proxy (on Secondary IP Address).....	201
FTP to Reverse FTP Proxy	203
SMTP to Mail Proxy or GWIA	206
POP3 to Mail Proxy.....	208
NNTP to News Proxy	210
RCONJ to Generic Proxy (on Secondary IP Address).....	212
BorderManager 3.7 VPN.....	214
BorderManager 3.7 Default VPN Filter Exceptions.....	214
Client-to-Site Filter Exceptions	215
Client-to-Site VPN for Clients Not Behind NAT.....	215
Client-to-Site VPN for Clients Behind NAT.....	216
Site-to-Site VPN Exceptions.....	219

Chapter 7 - Example Inbound Filter Exceptions Using Static NAT	224
Citrix WinFrame	225
FTP	229
GroupWise Remote Client.....	232
GroupWise Web Access Spell Check	234
IMAP	236
Lotus Notes Clients	238
Microsoft Terminal Server	240
pcANYWHERE	242
Locating Internal pcANYWHERE Host with UDP port 5632	243
Data Transfer Between pcANYWHERE Hosts using TCP port 5631.....	245
Alternative - Locating Internal pcANYWHERE Host with UDP port 22.....	247
POP3.....	249
SMTP.....	251
VNC.....	255
Web Servers.....	257
HTTP to Internal Web Server.....	257
HTTPS /SSL to Internal Web Server	259
Chapter 8 - BorderManager 2.1 – Stateful Filters Alternative.....	261
Generic Exception for TCP Return Traffic.....	263
Generic Exception for UDP Return Traffic	264
Chapter 9 - Advanced Topics.....	265
Basic Improvement - Enhance the Security of the Default Exceptions	265
Creating a Custom Dyn/ACK/TCP Filter Exception.....	267
Customizing the Default Dynamic/TCP Default Filter Exception	268
More Security - A DMZ Scenario	270
Step 1 – Set Filters on the DMZ NIC	272
Step 2 – Open Filter Exceptions for Inbound Traffic from the Internet to the DMZ.....	273
Step 3 – Open Filter Exceptions for Outbound Traffic from the Internal LAN to the DMZ.....	274
Most Security - Completely Customized Filter Exceptions.....	277
Allow Outbound HTTP for the HTTP Proxy Only	278
Allow Outbound HTTPS / SSL for the HTTP Proxy Only	278
Allow Non-Standard Ports Outbound for the HTTP Proxy Only	279
Blocking Chat Programs	280
Blocking AOL Instant Messenger (as of 02/20/2002).....	281
Blocking MSN Messenger (as of 11/29/2001)	281
Blocking ICQ (as of 2/20/2002)	282
Blocking Yahoo Messenger (as of 11/29/2001).....	282
Adding Dummy Static Routes.....	283
Entering a static route in NetWare.....	284
Chapter 10 - Troubleshooting.....	285
Is It A Filtering Problem?.....	285
Stateful Filter Exceptions Aren't Working.....	286
My Filter Exception Looks OK, But My Traffic Is Still Blocked	287
My Traffic is Blocked, But TCP IP DEBUG Doesn't Show Any Discards.....	288
None of My Traffic is Blocked – Filters Are Not Working.....	288
My Filtering Doesn't Seem to Be Working Like this Book.....	289
BorderManager 3.7 Filtering Issues.....	290
No Filters or Exceptions Show Up in FILTCFG for BorderManager 3.7.....	291
There is No NBMRuleContainer Object in NDS.....	291
Cannot Create the NBMRuleContainer Object in NDS.....	291

FILTSRV MIGRATE Process Gives –603 Errors	292
FILTSRV MIGRATE Process Gives –608 Errors	292
FILTSRV MIGRATE Process Gives –659 Errors	292
FILTSRV MIGRATE Completes With No Errors, FILTCFG Sees Nothing.....	292
Some Duplicate Filter Exceptions Exist in FILTCFG	292
I Have a Filter Exception with No Definition in FILTCFG	293
Filter Changes Not Showing Up At the BorderManager 3.7 Server	293
FILTSRV Returns a –6001 Error When Editing Filters in FILTCFG	293
FILTCFG Sees Filter Exceptions With Blank Packet Type	293
Deleted Filter Exceptions Keep Reappearing in FILTCFG.....	294
Server Console Shows “NWDSPutAttrVal returned with error –5”	294
Every Time My Server Starts, I See a FILTSRV Error	294
More Objects Appear in NBMRuleContainer Than I Have Filters or Exceptions	295
ACK Bit Filtering Not Working	295
My 3.7 Server Is Driving Me Nuts with Custom Filter Exceptions! How Can I Make It Like BorderManager 3.6?	296
Allow All Outbound IP from Public IP Address.....	296
Allow High Port Return Traffic to Public IP Address	296
Some BorderManager 3.7 Proxies Work, Some Don’t	297
No Option in iManager for NBM Access Management for BorderManager 3.7.....	297
Adding NBM Access Management Option to a Non-BorderManager Server	297
The BorderManager 3.7 HTTP Proxy Doesn’t Work for Some Web Sites	299
Server ABENDS if I Unload IPFLT Manually	300
Clustering Doesn’t Work With Filtering Enabled	300
Easy Fix – SET Statement to Change Filtering Behavior	300
Complex Fix – Change Clustering Address	301
APC PowerChute Software Doesn’t Work With Filtering	301
NAT Quit Working.....	301
BAD TCPIP.CFG FILE EXAMPLE.....	302
Fixing the Problem.....	304
NAT Works, but Intermittently, and Communications are Inconsistent or Strange.....	305
Some, or All of My Traffic Is Blocked, Even Proxies	305
BorderManager 3.7	305
Any BorderManager Version	305
The Application Keeps Changing Port Numbers.....	306
Stateful Filters or TCP/IP Communications Work, But Quit Working or Are Inconsistent	306
My Port Numbers Are Really Weird!	307
FTP-PORT-PASV-ST Stateful Filter Doesn't Work in BorderManager 3.5.....	308
POP3-ST Stateful Filter Doesn't Work in BorderManager 3.5	308
All IP Traffic Quits Working After Some Time.....	308
My Application Works For Me, But Not For My Friend Outside The Firewall.....	309
I Can't Filter Traffic That Brings Up My Dial-Up Connection!	309
Can't PING the Private IP Address of the BorderManager Server over Client-Site VPN.....	310
No VPTUNNEL Interface in INETCFG for Site-to-Site VPN Slave Server	311
Chapter 11 - Odds & Ends.....	312
Other Useful Port Numbers	312
LDAP	312
SQL	312
SSH.....	312
SOCKS	312
NetWare NCP Over IP	312
NDPS	312
SNMP.....	313
SCMD	313

SLP	313
IPP	313
WEBMIN.....	313
Renaming Your Interfaces to Public and Private.....	314
Fixing the BorderManager 3.5 POP3-ST Definition.....	315
Novell's FILT01A.EXE File	316
Packet Filter Logging.....	317
NetWare for Small Business (SBS)	317
Chapter 12 - Other References	318
Index	319
